

For Authors and Analysts

TIBCO Spotfire Professional is designed to be easy to use. However we recognize that you need to get up to speed quickly, and we have developed a fast-track 2-day course to give you the essential skills. For those who are intensive users of Spotfire, we have more advanced courses for Analysts and Authors.

TIBCO Spotfire Professional Essentials (2 days)

Coverage of all Spotfire visualizations and tables including the latest additions of treemap, heat map and combination chart. We also look at some Spotfire core concepts which are not present in similar software: filtering, marking and drill-down, plus the all-important Details Visualization. In addition we look at managing 'real' data and show you how to merge, pivot, and transform your data into just the right format for the analysis you need. There is also an extended lab tying together all of the crucial concepts. When booking online, look for the codes **SP121** and **SP131**. The course datasheets with more complete details, including videos, are available at : <http://admin.viewcentral.com/events/uploads/TIBCO/SP121.pdf> and <http://admin.viewcentral.com/events/uploads/TIBCO/SP131.pdf>

TIBCO Spotfire Professional for Advanced Analysts

This 1-day course covers curve fitting, custom expressions, calculated columns, statistics tools, error bars, the Over statement and node navigation, hierarchical clustering, line similarity, K-means clustering. When booking online, look for the code **SP141**. The course datasheet is available at; <http://admin.viewcentral.com/events/uploads/TIBCO/SP141.pdf>

TIBCO Spotfire Professional for Authors

This 1-day course covers everything you need to make your analysis application more accessible to large audiences, whether they are using Spotfire Professional, the Enterprise Player or Web Player clients. We consider bookmarks, tags, text areas, script controls, coloring, information link basics, automating Spotfire, and specific tips for authoring in the web/enterprise player. When booking online, look for the code **SP151**. The course datasheet is available at: <http://admin.viewcentral.com/events/uploads/TIBCO/SP151.pdf>

For Spotfire Developer

SP221 TIBCO Spotfire Developer: Foundation (1 day)

This is for people new to C# or .NET or people who need help to configure Visual Studio.

SP231 Automation APIs using C# (1 day)

SP232 Automation APIs using IronPython (1 day)

All about automating the Spotfire Professional application using either the C# APIs or IronPython.

SP241 Basic Extensions and Tools (1 day)

Learn how to extend Spotfire clients by adding custom tools, calculations, expressions and aggregation methods, packaging and deploying extensions, localization, licenses and troubleshooting.

SP251 Advanced Extensions and Visualizations (2 days)

Understand what a Document Node is and how to create one, learn how to create and attach nodes to the Document Model, understand and develop different types of custom visualization, learn how to use data views to represent your data, plus how to create tools with state.

For Administrators

SP301 TIBCO Spotfire Administration Essentials I

SP302 TIBCO Spotfire Administering Essentials II

SP311 TIBCO Spotfire Information Services

SP312 TIBCO Spotfire Application Data Services

Enterprise Web-Based Training

Our WBT offering is recommended for all users of Spotfire Professional, in addition to traditional training. This can be delivered as a plug-in directly into the Professional client, or via a web browser, and goes several steps beyond the user guide to help you get the most out of Spotfire. Please contact spotfireregistrar@tibco.com for details.

Blended Training and Bootcamps

Our 'blended' delivery model is both intensive and flexible. You can access all of the training materials for 60 days from the office, home or airport, from any internet-enabled computer. During that time, you have access to an instructor for support and coaching as needed. Our user and administration courses also include a 2-hour webinar or classroom seminar. Our developer courses handle all support via 1-1 sessions.

Bootcamp is the name for our extended 8+ week college-style learning. There are tracks for Authors (using Spotfire Professional), Developers and Administrators featuring all the benefits of Blended training, plus extra content and several webinars. Contact spotfireregistrar@tibco.com for details.
